

Oxford Garden: Built-in Quality

At Oxford Garden, we're not content with resting on our laurels. Instead, we continually examine and reexamine our products, designs, and manufacturing processes to find opportunities for improvement. We strive to offer the finest outdoor wood furniture at affordable prices by focusing on the following cornerstones:

- **Product dry-fitting.** Before we package and ship any product, we put it together ourselves to ensure that it assembles seamlessly. You can rest assured you'll receive a genuine Oxford Garden piece with a precise fit and unrivaled stability.
- **Rigorous consumer safety measures.** A majority of our products undergoes stringent consumer safety tests to ensure that they're completely safe and suitable for their intended uses. Because product safety is a primary concern, ongoing tests are conducted from the design stage through completion of the manufacturing process, providing our customers with peace of mind.
- **Multiple quality control checkpoints.** Quality control gateways, or checkpoints, are nothing new in manufacturing, but at Oxford Garden we take it a step further. We have established a unique multiple quality control checkpoint program—in the event that a problem arises, we obtain the specific information required to pinpoint and fix it. We stand behind each handcrafted item with rigorous quality control protocols.

We work tirelessly to ensure that each product is of a high enough caliber to bear the Oxford Garden name. After comprehensive testing of premium building materials, our multiple checkpoint quality control system provides several opportunities to detect and address any issues that may arise during the production process. All products are dry-fitted, inspected, and tested for safety before packaging for shipping. At Oxford Garden, we guarantee that top-notch quality is built into everything we make.
